

VILLAGE OF PALMYRA STREET DEPARTMENT

Traffic within the Village of Palmyra circulates across a roadway system that has a combined length of 11.2 miles. The majority of roadways in the Village average 20'-24' in width and are local access roads with gravel or grassy type shoulders. Two main collector roads, CTH E and CTH H; as well as two arterial traffic roads, STH 59 and STH 106 also run through the Village. Snow removal, shouldering, patchwork and right of way maintenance work is performed by the DPW on all roadways within the Village, excluding STH 59 & STH 106. Road paving, road reconstruction and other types of roadway surface maintenance is performed by outside contractors and is supervised by the DPW.
